Micro Mist® Small Volume Nebulizer

Delivering consistent performance at all angles

The Micro Mist Small Volume Nebulizer is designed for performance, flexibility and speed. It delivers medication in an optimal particle size[1]* for inhalation at angles up to 90°[2], plus:

- Delivers a fine, dense mist at a particle size of 2.1 µm[2]
- Versatile design maximizes placement options, without sacrificing aerosol quality
- Designed for hand-held use but can also be used while laying down
- Also designed to be used in-line with circuits

The Clinician

Can be used for hand-held or in-line treatments providing flexibility in medication administration

Your Institution

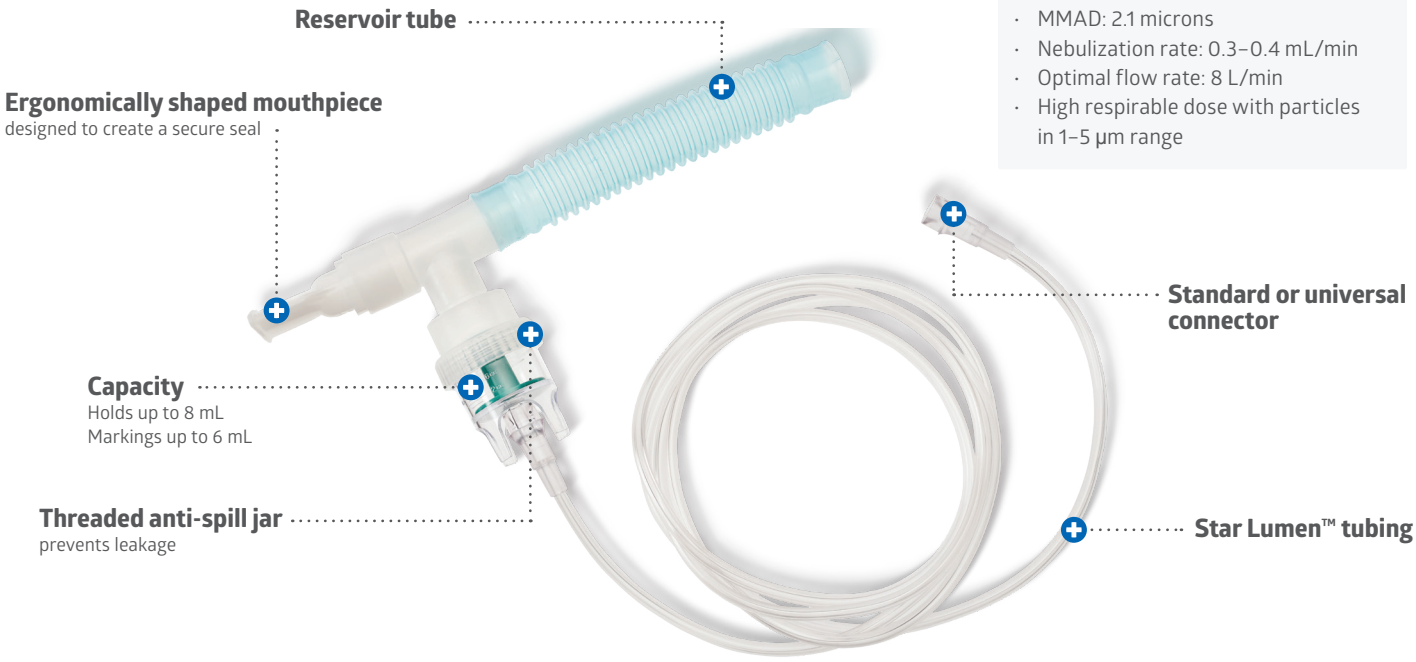
Economical and offered in a variety of configurations to meet a wide range of clinical needs

The Patient

Capillary design effectively administers medication to patients in upright or supine positions with an ideal MMAD and high respirable dose[2]

Micro Mist Fast Facts

Consistent performance at angles up to 90°[2] with anti-spill design	Optimal 1–5 µm particle size delivered at efficient nebulization rates[2]*	Jet stays in place unless intentionally removed	Available in multiple kit configurations with choice of adult or pediatric mask	High respirable dose[2]



Performance Characteristics[2]

- MMAD: 2.1 microns
- Nebulization rate: 0.3–0.4 mL/min
- Optimal flow rate: 8 L/min
- High respirable dose with particles in 1–5 µm range

Micro Mist® Small Volume Nebulizer

Item No.	Nebulizer	Tee	Mouthpiece	Reservoir Tube	7 ft. Star Lumen Tubing	Standard Connector	ClearConnect Connector	Universal Connector	Adult Mask	Ped Mask	Pkg.
